

CONTENTS

Preface	iii
Summary	v
Acknowledgments	xvii
1.0 Introduction	1.1
1.0.1 Current Site Mission	1.1
1.0.2 Overview of the Hanford Site	1.2
1.0.3 Site Management	1.5
1.0.4 References	1.6
2.0 Environmental Regulatory Compliance	2.1
2.1 Stakeholder and Tribal Involvement	2.3
2.1.1 Regulatory Oversight	2.3
2.1.2 Hanford Federal Facility Agreement and Consent Order	2.3
2.1.3 The Role of Indian Tribes and Nations	2.4
2.1.4 Hanford Natural Resource Trustee Council	2.5
2.1.5 Public Participation	2.5
2.1.6 Hanford Advisory Board	2.6
2.1.7 Hanford Site Technology Coordination Group	2.6
2.2 Compliance Status	2.9
2.2.1 Hanford Federal Facility Agreement and Consent Order	2.9
2.2.1.1 Tri-Party Agreement Milestones	2.9
2.2.1.2 Approved Modifications to the Tri-Party Agreement	2.11
2.2.2 Environmental Management Systems	2.11
2.2.3 Chemical Management Systems	2.13
2.2.4 Comprehensive Environmental Response, Compensation, and Liability Act	2.13
2.2.5 Emergency Planning and Community Right-To-Know Act	2.13
2.2.6 Resource Conservation and Recovery Act	2.14
2.2.6.1 Hanford Facility RCRA Permit	2.15
2.2.6.2 RCRA/Dangerous Waste Permit Applications and Closure Plans	2.15
2.2.6.3 RCRA Groundwater Monitoring	2.15
2.2.6.4 RCRA Inspections	2.19
2.2.7 Clean Air Act	2.19
2.2.8 Clean Water Act	2.21
2.2.9 Safe Drinking Water Act	2.21
2.2.10 Toxic Substances Control Act	2.22
2.2.11 Federal Insecticide, Fungicide, and Rodenticide Act	2.23
2.2.12 Endangered Species Act of 1973	2.23
2.2.13 Migratory Bird Treaty Act	2.23
2.2.14 Cultural Resources	2.23

2.2.15	National Environmental Policy Act	2.24
2.2.15.1	Recent Environmental Impact Statements	2.25
2.2.15.2	Programmatic and Offsite Environmental Impact Statements	2.25
2.2.15.3	Site-Specific Environmental Impact Statements in Progress	2.26
2.2.15.4	Recent Environmental Assessments	2.26
2.2.16	The Hanford Site Institutional Controls Plan	2.26
2.3	Hanford Cleanup Operations	2.29
2.3.1	Pollution Prevention Program	2.29
2.3.2	Spent Nuclear Fuel Project	2.29
2.3.3	Central Plateau Remediation Project	2.30
2.3.3.1	Accelerated Deactivation Project	2.30
2.3.3.2	327 and 324 Facilities Deactivation Project	2.31
2.3.3.3	Equipment Disposition Project	2.31
2.3.3.4	233-S Plutonium Concentration Facility Decommissioning Project	2.32
2.3.3.5	200 Area Facilities Disposition Project	2.32
2.3.3.6	Canyon Disposition Initiative	2.33
2.3.4	Fast Flux Test Facility	2.33
2.3.5	Advanced Reactors Transition Project	2.34
2.3.6	Plutonium Finishing Plant	2.34
2.3.7	Waste Encapsulation and Storage Facility Project	2.35
2.3.8	Office of River Protection	2.35
2.3.8.1	Waste Tank Status	2.35
2.3.8.2	Waste Tank Closure Acceleration	2.36
2.3.8.3	Geophysical Logging for Vadose Zone Characterization and Monitoring	2.36
2.3.8.4	Monitoring Activities in the Single-Shell Tank Farms	2.37
2.3.8.5	Waste Immobilization	2.37
2.3.9	Solid Waste Management	2.37
2.3.9.1	Central Waste Complex	2.37
2.3.9.2	Waste Receiving and Processing Facility	2.38
2.3.9.3	Radioactive Mixed Waste Disposal Facility	2.38
2.3.9.4	T Plant Complex	2.38
2.3.9.5	Radioactive Mixed Waste Treatment and Disposal	2.39
2.3.9.6	Radioactive Mixed Waste Treatment Contracts	2.39
2.3.9.7	Navy Reactor Compartments	2.40
2.3.10	Liquid Effluent Treatment	2.40
2.3.10.1	242-A Evaporator	2.40
2.3.10.2	Liquid Effluent Retention Facility	2.40
2.3.10.3	Effluent Treatment Facility	2.41
2.3.10.4	200 Area Treated Effluent Disposal Facility	2.41
2.3.10.5	300 Area Treated Effluent Disposal Facility	2.41
2.3.10.6	Miscellaneous Streams	2.42
2.3.11	Revegetation and Mitigation Planning	2.43
2.3.12	Environmental Restoration Project	2.44
2.3.12.1	Environmental Restoration Disposal Facility	2.44
2.3.12.2	Waste Site Remediation	2.44
2.3.12.3	Facility Decommissioning Project	2.45
2.3.12.4	Surveillance/Maintenance and Transition Project	2.46
2.3.13	Groundwater Protection Program	2.46
2.3.13.1	Groundwater Remediation	2.46
2.3.13.2	Soil Zone Remediation	2.48

2.3.13.3	Waste Site Investigations – Operable Units	2.48
2.3.13.4	Waste Site Investigations – Vadose Zone Characterization	2.51
2.3.13.5	Assessment of Hanford Impact	2.51
2.3.13.6	Science and Technology	2.52
2.3.13.7	Integration Management: Strategic Planning, Public Involvement, and Databases	2.53
2.3.14	Hanford Waste Tanks Research and Technology Development	2.54
2.3.14.1	Safe Waste Storage	2.54
2.3.14.2	Tank Waste Retrieval	2.54
2.3.14.3	Tank Waste Processing	2.55
2.4	Environmental Occurrences	2.57
2.4.1	Emergency Occurrences	2.57
2.4.2	Unusual Occurrences	2.57
2.4.3	Off-Normal Occurrences	2.57
2.5	Waste Management and Chemical Inventories	2.59
2.5.1	Waste Management	2.59
2.5.2	Chemical Inventories	2.61
2.6	References	2.63
3.0	Facility-Related Monitoring	3.1
3.1	Facility Effluent Monitoring	3.3
3.1.1	Radioactive Airborne Emissions	3.4
3.1.2	Non-Radioactive Airborne Emissions	3.5
3.1.3	Radioactive Liquid Effluent	3.6
3.1.4	Non-Radioactive Hazardous Materials in Liquid Effluent	3.7
3.1.5	CERCLA and Washington Administrative Code Releases to the Environment	3.7
3.2	Near-Facility Environmental Monitoring	3.9
3.2.1	Air Monitoring	3.9
3.2.2	Spring Water Monitoring	3.15
3.2.3	Radiological Surveys of Surface Contamination	3.15
3.2.4	Soil and Vegetation Monitoring	3.17
3.2.4.1	Radiological Results for Soil Samples	3.17
3.2.4.2	Radiological Results for Vegetation Samples	3.18
3.2.5	External Radiation	3.25
3.2.6	Investigative Sampling	3.28
3.3	References	3.33
4.0	Environmental Surveillance Information	4.1
4.0.1	Surface Environmental Surveillance	4.1
4.0.1.1	Surveillance Objectives	4.1
4.0.1.2	Surveillance Design	4.2
4.1	Air Surveillance	4.7
4.1.1	Collection of Air Samples and Analytes Tested	4.7
4.1.2	Radiological Results for Air Samples	4.10
4.1.3	Air Particulate Monitoring	4.16

4.2	Surface Water and Sediment Surveillance	4.19
4.2.1	Columbia River Water	4.19
4.2.1.1	Collection of River-Water Samples and Analytes of Interest	4.23
4.2.1.2	Radiological Results for River-Water Samples	4.24
4.2.1.3	Chemical and Physical Results for River-Water Samples	4.29
4.2.2	Riverbank Spring Water.....	4.31
4.2.2.1	Collection of Water Samples from Riverbank Springs and Analytes of Interest	4.32
4.2.2.2	Radiological Results for Water Samples from Riverbank Springs	4.32
4.2.2.3	Chemical Results for Water Samples from Riverbank Springs	4.33
4.2.3	Columbia River and Riverbank Springs Sediment	4.35
4.2.3.1	Collection of Sediment Samples and Analytes of Interest	4.36
4.2.3.2	Radiological Results for Sediment Samples from Columbia River	4.38
4.2.3.3	Radiological Results for Sediment Samples from Riverbank Springs	4.38
4.2.3.4	Chemical Results for Sediment Samples from the Columbia River and Riverbank Springs	4.38
4.2.4	Onsite Pond Water and Sediment	4.40
4.2.4.1	Collection of Pond Water and Sediment Samples and Analytes of Interest	4.41
4.2.4.2	Radiological Results for Pond Water and Sediment Samples	4.41
4.2.5	Irrigation Water	4.41
4.3	Radiological Surveillance of Hanford Site Drinking Water	4.43
4.3.1	Hanford Site Drinking Water Systems	4.43
4.3.2	Hanford Site Drinking Water Supply Facilities	4.43
4.3.3	Collection of Drinking Water Samples and Analytes of Interest	4.46
4.3.4	Radiological Results for Hanford Site Drinking Water Samples	4.46
4.4	Food and Farm Product Surveillance	4.49
4.4.1	Milk Samples and Analytes of Interest	4.49
4.4.2	Vegetable Samples and Analytes of Interest	4.52
4.4.3	Fruit Samples and Analytes of Interest	4.53
4.4.4	Wine Samples and Analytes of Interest	4.53
4.5	Fish and Wildlife Surveillance	4.55
4.5.1	Fish Samples and Analytes of Interest	4.57
4.5.2	Wildlife Sampling	4.58
4.5.2.1	Upland Game Samples and Analytes of Interest	4.58
4.5.2.2	Deer Samples and Analytes of Interest	4.59
4.6	External Radiation Surveillance	4.61
4.6.1	External Radiation Measurements	4.62
4.6.2	Radiological Survey Results	4.68
4.6.3	Pressurized Ionization Chamber Results	4.68

FIGURES

S.1	Hanford Site Pump-and-Treat and Soil-Vapor Extraction Systems	xii
S.2	National Annual Average Radiological Doses from Various Sources	xiv
1.0.1	The Hanford Site and Surrounding Area	1.3
1.0.2	Management Units on the Hanford Reach National Monument	1.4
3.1.1	Liquid Releases of Selected Radionuclides from the Hanford Site, 1992 through 2002	3.3
3.1.2	Airborne Releases of Selected Radionuclides from the Hanford Site, 1992 through 2002	3.4
3.2.1	Average Concentrations of Selected Radionuclides in Near-Facility Air Samples Collected on the Hanford Site Compared to Those Collected in Distant Communities, 1997 through 2002	3.12
3.2.2	Average Concentrations of Selected Radionuclides in Near-Facility Soil Samples Collected on the Hanford Site Compared to Those Collected in Distant Communities, 1997 through 2002	3.19
3.2.3	Average Concentrations of Selected Radionuclides in Near-Facility Vegetation Samples Collected on the Hanford Site Compared to Those Collected in Distant Communities, 1997 through 2002	3.23
3.2.4	Annual Average Thermoluminescent Dosimeter Results in the 100-N Area on the Hanford Site, 1987 through 2002	3.27
3.2.5	Average Annual Dose Rates at N Springs on the Hanford Site, 1987 through 2002	3.28
3.2.6	Annual Average Thermoluminescent Dosimeter Results in the 200 Areas on the Hanford Site, 1987 through 2002	3.29
3.2.7	Annual Average Thermoluminescent Dosimeter Results in the 300/400 Areas of the Hanford Site and at the 300 Area Treated Effluent Disposal Facility, 1991 through 2002	3.29
4.0.1	Potential Pathways for Human and Biota Exposure to Effluent and Emissions from the DOE's Hanford Site	4.4
4.1.1	Pacific Northwest National Laboratory Air Sampling Locations On and Around the Hanford Site During 2002	4.8
4.1.2	Gross Alpha and Gross Beta Concentrations in Airborne Particulate Samples Collected On and Distant from the Hanford Site During 2002	4.13
4.1.3	Annual Average Tritium Concentrations Measured in Air by Pacific Northwest National Laboratory On and Distant from the Hanford Site and Hanford Site 300 Area Tritium Emissions, 1997 through 2002	4.14
4.1.4	Iodine-129 Concentrations in Air at the Hanford Site, 1997 through 2002	4.14
4.1.5	Annual Average Plutonium-239/240 Concentrations in Air at the Hanford Site, 1997 through 2002	4.15
4.1.6	Quarterly Average Plutonium-239/240 Concentrations in Air at Selected Sampling Locations on the Hanford Site, 2002	4.15

4.1.7	Daily Average PM ₁₀ Concentrations at the Hanford Meteorology Station, 2002	4.17
4.1.8	Daily Average PM ₁₀ Concentrations Compared to Daily Average Wind Speeds at the Hanford Meteorology Station, January through March 2002	4.17
4.1.9	Daily Average PM _{2.5} Concentrations at the Hanford Meteorology Station, 2002	4.18
4.2.1	Hanford Site Environmental Surveillance Project Sampling Locations for Water and Sediment, 2002	4.20
4.2.2	Mean, Maximum, and Minimum Monthly Columbia River Flow Rates at Priest Rapids Dam, Washington, 2002	4.22
4.2.3	Annual Average Gross Alpha Concentrations in Columbia River Water Upstream and Downstream of the Hanford Site, 1997 through 2002	4.24
4.2.4	Annual Average Gross Beta Concentrations in Columbia River Water Upstream and Downstream of the Hanford Site, 1997 through 2002	4.25
4.2.5	Annual Average Tritium Concentrations in Columbia River Water Upstream and Downstream of the Hanford Site, 1997 through 2002	4.25
4.2.6	Annual Average Strontium-90 Concentrations in Columbia River Water Upstream and Downstream of the Hanford Site, 1997 through 2002	4.26
4.2.7	Annual Average Total Uranium Concentrations in Columbia River Water Upstream and Downstream of the Hanford Site, 1997 through 2002	4.26
4.2.8	Annual Average Iodine-129 Concentrations in Columbia River Water Upstream and Downstream of the Hanford Site, 1997 through 2002	4.26
4.2.9	Tritium Concentrations in Cross-River Transect Water Samples from the Hanford Reach of the Columbia River, September 2002	4.27
4.2.10	Tritium Concentrations in Columbia River Water Collected at the Hanford Shoreline, September 2002	4.28
4.2.11	U.S. Geological Survey Water Quality Measurements for the Columbia River Upstream and Downstream of the Hanford Site, 1997 through 2002	4.30
4.2.12	Concentrations of Selected Radionuclides in Columbia River Riverbank Spring Water at the Hanford Town Site, 1997 through 2002	4.34
4.2.13	Concentrations of Selected Radionuclides in Water from Columbia River Riverbank Springs Near the 300 Area of the Hanford Site, 1997 through 2002	4.35
4.2.14	Median, Maximum, and Minimum Concentrations of Selected Radionuclides Measured in Columbia River and Snake River Sediment, 1997 through 2002	4.39
4.2.15	Median, Maximum, and Minimum Concentrations of Selected Metals Measured in Columbia River Sediment, 2002	4.40
4.2.16	Average Acid Volatile Sulfide/Simultaneously Extracted Zinc and Sum of Simultaneously Extracted Metals in Columbia River Sediment, 1997 through 2000 Compared to 2002 Data.....	4.41

4.2.17	Median, Maximum, and Minimum Gross Beta and Tritium Concentrations in Water Samples from the Fast Flux Test Facility Pond on the Hanford Site, 1997 through 2002	4.42
4.2.18	Median, Maximum, and Minimum Concentrations of Tritium in Water Samples from West Lake on the Hanford Site, 1997 through 2002	4.42
4.3.1	Hanford Site Drinking Water Supply Facilities, 2002	4.45
4.3.2	Tritium Concentrations in Drinking Water from Three Wells in the Hanford Site's 400 Area, 1985 through 2002	4.48
4.4.1	Food and Farm Product Sampling Locations Around the Hanford Site, 2002	4.50
4.4.2	Median, Maximum, and Minimum Iodine-129 Concentrations in Milk Samples Collected Near the Hanford Site, 1996 through 2002	4.51
4.4.3	Median, Maximum, and Minimum Tritium Concentrations in Milk Samples Collected Near the Hanford Site, 1998 through 2002	4.52
4.4.4	Median, Maximum, and Minimum Tritium Concentrations in Wine Samples Collected Near the Hanford Site in 1996 through 2002	4.53
4.5.1	Fish and Wildlife Sampling Locations On and Around the Hanford Site, 2002	4.56
4.5.2	Median, Maximum, and Minimum Strontium-90 Concentrations in Columbia River Carp Carcasses at the Hanford Site, 2002 Compared to Previous Years	4.57
4.5.3	Median, Maximum, and Minimum Strontium-90 Concentrations in Hanford Site and Background Upland Game Bone Samples, 2002 Compared to Previous Years	4.59
4.5.4	Median, Maximum, and Minimum Strontium-90 Concentrations in Hanford Site and Background Deer Bone Samples, 2002 Compared to Previous Years	4.60
4.5.5	Comparison of Median, Maximum, and Minimum Strontium-90 Concentrations in the Bones of Deer, Quail, and Fish Collected on the Hanford Site Near the 100-N Area, 2002	4.60
4.6.1	Surface Environmental Surveillance Project Thermoluminescent Dosimeter Locations on the Hanford Site, 2002	4.63
4.6.2	Community, Distant, and Perimeter Thermoluminescent Dosimeter Locations Around the Hanford Site, 2002	4.64
4.6.3	Hanford Site Surface Environmental Surveillance Project Thermoluminescent Dosimeter Locations Along the Columbia River, 2002	4.65
4.6.4	Annual Average Dose Rates at Onsite, Perimeter, and Distant Locations of the Hanford Site, 1997 through 2002	4.67
4.6.5	Maximum and Average External Dose Rates Measured Along the Columbia River at 100-N Area Shoreline Locations on the Hanford Site, 1997 through 2002	4.68
5.0.1	Locations Important to Dose Calculations at the Hanford Site	5.3
5.0.2	Calculated Dose to the Hypothetical, Maximally Exposed Individual at the Hanford Site, 1998 through 2002	5.4

5.0.3	Collective Dose to the Population within 80 Kilometers of the Hanford Site, 1998 through 2002	5.5
5.0.4	National Annual Average Radiological Doses from Various Sources	5.6
6.1.1	Unconfined Aquifer Monitoring Well Locations on the Hanford Site During 2002	6.7
6.1.2	Confined Aquifer Monitoring Well Locations on the Hanford Site During 2002	6.8
6.1.3	Locations of RCRA Groundwater Monitoring Waste Management Areas on the Hanford Site During 2002	6.9
6.2.1	Average Tritium Concentrations in the Unconfined Aquifer Beneath the Hanford Site, 2002	6.14
6.2.2	Average Tritium and Carbon-14 Concentrations at the 100-K Area of the Hanford Site, 2002	6.17
6.2.3	Tritium Concentrations in Hanford Site Well 199-K-30 Downgradient of the 116-KE-1 Crib, 1982 through 2002	6.18
6.2.4	Tritium Concentrations in Hanford Site Wells 199-K-27 and 199-K-32A Downgradient of the 116-KE-1 Crib, 1988 through 2002	6.19
6.2.5	Tritium Concentrations in Hanford Site Well 699-40-1 Near the Columbia River, 1961 through 2002	6.20
6.2.6	Tritium Concentrations in Hanford Site Well 699-24-33 Downgradient of 200-East Area, 1961 through 2002	6.21
6.2.7	Current and Historical Tritium Concentrations in Hanford Site Groundwater	6.22
6.2.8	Average Tritium Concentrations and Groundwater Flow Near the Hanford Site's 300 Area, 2002	6.24
6.2.9	Location of the 618-11 Burial Ground on the Hanford Site	6.25
6.2.10	Average Tritium Concentrations in the Unconfined Aquifer at the Hanford Site's 618-11 Burial Ground, 2002	6.26
6.2.11	Average Iodine-129 and Tritium Concentrations in the Unconfined Aquifer at the Hanford Site, 2002	6.28
6.2.12	Average Technetium-99, Total Uranium, and Strontium-90 Concentrations in the Unconfined Aquifer Near the 200-East Area on the Hanford Site, 2002	6.30
6.2.13	Average Technetium-99 and Total Uranium Concentrations in the Unconfined Aquifer at the Hanford Site's 200-West Area, 2002	6.31
6.2.14	Uranium Concentrations in Hanford Site Well 299-W19-36, a Pump-and-Treat Well Adjacent to U Plant, 1997 through 2002	6.33
6.2.15	Average Total Uranium Concentrations in the Unconfined Aquifer at the Hanford Site's 300 Area, 2002	6.34
6.2.16	Average Strontium-90 Concentrations in the Unconfined Aquifer at the Hanford Site's 100-N Area, 2002	6.36
6.2.17	Average Nitrate Concentrations in the Hanford Site Unconfined Aquifer, 2002	6.39
6.2.18	Average Filtered Chromium Concentrations at the Hanford Site's 100-D and 100-H Areas, 2002	6.43

6.2.19	Hexavalent and Filtered Chromium Concentrations in Hanford Site Well 199-D5-39, Located in the Southwestern 100-D Area, 1999 through 2002	6.44
6.2.20	Average Filtered Chromium Concentrations at the Hanford Site's 100-K Area, 2002	6.45
6.2.21	Average Chlorinated Hydrocarbon Concentrations in the Unconfined Aquifer at the Hanford Site's 200-West Area, 2002	6.47
6.2.22	Concentrations of Tritium and Other Contaminants in Confined Aquifer Wells on the Hanford Site, 2002	6.50
6.2.23	Water-Table Elevations for the Unconfined Aquifer at the Hanford Site, March 2002	6.52
6.3.1	Cross Sections of Alternative Conceptual Models with the Least Total Mud Extent, Median Total Mud Extent, and Most Total Mud Extent	6.54
6.3.2	Alternative Distribution of Hanford Formation Sediment Types with the Lowest Overall Hydraulic Conductivity	6.55
6.3.3	Alternative Distribution of Hanford Formation Sediment Types with the Median Overall Hydraulic Conductivity	6.55
6.3.4	Alternative Distribution of Hanford Formation Sediment Types with the Highest Overall Hydraulic Conductivity	6.55
7.1.1	Groundwater Monitoring Wells Near the F Reactor in the 100-F Area of the Hanford Site	7.4
7.1.2	Groundwater Monitoring Wells in the 200-West Area of the Hanford Site	7.6
7.1.3	Groundwater Monitoring Wells in the 200-East Area of the Hanford Site	7.8
7.2.1	Uranium-238 Contamination North of the BX Tank Farm in the 200-East Area of the Hanford Site	7.15
7.2.2	Comparison of 1991, 1997, and 2002 Spectral Gamma Logs from Borehole 299-E33-41 Located East of the BX Tank Farm in the 200-East Area of the Hanford Site	7.16
7.2.3	Schematic View of the Pacific Northwest National Laboratory Water Fluxmeter	7.18
7.2.4	Total Head Profile Near Tank B-110 in the Hanford Site's B Tank Farm Showing Unit Gradient Conditions	7.19
7.2.5	Subsurface Temperature Data from the Hanford Site's B Tank Farm Near Tank B-110	7.20
7.3.1	Cross Section of the Hanford Site Prototype Barrier Showing Interactive Water Balance Processes, Gravel Side Slope, and Basalt Riprap Side Slope	7.22
7.3.2	Location of Windbreak in the 200-West Area of the Hanford Site Showing Locations of the Tree Line, Water Drip Line, and Water Flux Meters	7.28
7.3.3	New Hanford Site Stratigraphic Nomenclature and Comparison to Previous Hanford Nomenclature	7.30
8.1.1	Hanford Meteorological Monitoring Network Wind Roses, 2002	8.6
8.2.1	Number of Fall Chinook Salmon Spawning Redds in the Hanford Reach of the Columbia River, 1948 through 2002	8.10

8.2.2	Average Strontium-90 Concentrations in Canada Goose Eggshells Collected from the Hanford Reach of the Columbia River Between 1985 and 2002	8.11
8.2.3	Length Frequencies for Asiatic Clam Shells Located in Gravel Substrates Along Shoreline Areas in the Hanford Reach of the Columbia River that are Inundated 95% of the Time, Fall 2002	8.12
8.2.4	Asiatic Clam Densities in Four Substrate Categories Along Shoreline Areas that are Inundated 95% of the Time in the Hanford Reach of the Columbia River - Fall 2002	8.13
8.2.5	Asiatic Clam Occurrence on the Hanford Reach of the Columbia River with Respect to Amount of Time Shoreline was Covered with Water, 2002	8.13
8.2.6	Rare Plant Locations on the Hanford Site, 2002	8.15
8.2.7	Percent Cover of Bare Soil and Vegetation on Monitoring Plots on the Hanford Reach After the 2000 24 Command Wildland Fire	8.16
8.2.8	Perch Time of a Bald Eagle Nesting Pair at Major Perching Locations on the Hanford Reach of the Columbia River Relative to Their Nest Location, 2002	8.18
8.2.9	Percentage of Bald Eagles by Age Class on the Hanford Reach of the Columbia River thatFlushed in Response to Vehicular or Boat Disturbance, 2002	8.18
8.2.10	Flushing Distance of Bald Eagles in Response to Boat and Vehicle Disturbance on the Hanford Reach of the Columbia River	8.19
8.3.1	Measured Erosion at Locke Island Erosion Transects Near the Hanford Site, 2002	8.22
8.3.2	Total Measured Erosion at Locke Island Erosion Transects Near the Hanford Site Between November 1995 and September 2002	8.22
8.3.3	Cultural Resources Reviews Requested Each Calendar Year at the Hanford Site	8.25
8.3.4	Former and Current Buildings and Structures at the Hanford Site Documented with a Washington State Historic Property Inventory Form	8.26
8.3.5	Historic Sites are Commonly Discovered During Cultural Resource Surveys Conducted at the Hanford Site	8.27
8.3.6	K-West Reactor, Eligible for Listing in the National Register of Historic Places as a Contributing Property Recommended for Mitigation within the Hanford Site Manhattan Project and Cold War Era Historic District	8.27
8.4.1	Community Members See Environmental Surveillance in Action at a Community-Operated Environmental Surveillance Station in Richland, Washington	8.29
8.6.1	Soil and Vegetation Sampling Locations Along White Pass in the Cascade Mountains of Washington State, 2002	8.35
8.6.2	Cesium-137 Concentrations in Soil Samples Collected Along White Pass in the Cascade Mountains of Washington State During 2002 and on the Hanford Site's Fitzner/Eberhardt Arid Land Ecology Reserve Unit During 2001	8.37
A.1	A Graphical Representation of Maximum, Median, and Minimum Values	A.6
A.2	Data Plotted Using a Linear Scale	A.6

A.3	Data Plotted Using a Logarithmic Scale	A.7
A.4	Data with Error Bars Plotted Using a Linear Scale	A.7

TABLES

S.1	Compliance with Federal Acts at the Hanford Site in 2002	vi
S.2	Hanford Site Monitoring Results for 2002	viii
S.3	Summary of Groundwater Pump-and-Treat Systems and a Soil-Vapor Extraction System	xi
2.2.1	Hanford Site Tri-Party Agreement Change Requests Approved During 2002	2.12
2.2.2	Emergency Planning and Community Right-To-Know Act Compliance Reporting at the Hanford Site During 2002	2.14
2.2.3	RCRA Interim and Final Status Groundwater Monitoring Projects at the Hanford Site, September 2002	2.16
2.2.4	New RCRA Well Installation Summary for the Hanford Site, 2002	2.19
2.3.1	Permits for Miscellaneous Waste Streams on the Hanford Site	2.42
2.5.1	Quantities of Solid Waste Generated on the Hanford Site, 1997 through 2002, kg	2.60
2.5.2	Quantities of Solid Waste Received on the Hanford Site from Offsite Sources, 1997 through 2002, kg	2.60
2.5.3	Quantities of Hazardous Waste Shipped Off the Hanford Site, 1997 through 2002, kg	2.60
2.5.4	Radioactive Solid Waste Stored or Disposed of on the Hanford Site, 2002	2.61
2.5.5	Quantities of Liquid Waste Generated and Stored Within the Tank Farm System on the Hanford Site During 2002 and During Each of the Previous 5 Years, L	2.62
2.5.6	Average Quantity of Ten Hazardous Chemicals Stored on the Hanford Site, 2002	2.62
3.1.1	Radionuclides Discharged to the Atmosphere at the Hanford Site, 2002	3.5
3.1.2	Non-Radioactive Pollutants Discharged to the Atmosphere at the Hanford Site, 2002	3.6
3.1.3	Radionuclides in 200 Areas Liquid Effluent Discharged to the State-Approved Land Disposal Site at the Hanford Site, 2002	3.7
3.1.4	Radionuclides in Liquid Effluent from the Hanford Site's 100 Areas Discharged to the Columbia River, 2002	3.7
3.2.1	Hanford Site Near-Facility Routine Environmental Monitoring Samples and Locations, 2002	3.10
3.2.2	Hanford Site Near-Facility Air Sampling Locations and Analyses, 2002	3.11

3.2.3	Annual Average and Maximum Concentrations of Radionuclides in Near-Facility Air Samples Collected on the Hanford Site, 2002	3.13
3.2.4	Radionuclide Concentrations in Samples Collected from Springs Along the Columbia River Shoreline in the 100-N Area of the Hanford Site, 2002	3.15
3.2.5	Status of Outdoor Contamination at the Hanford Site, 2002	3.16
3.2.6	Status Change of Posted Contaminated Areas on the Hanford Site, 2002	3.16
3.2.7	Average Radionuclide Concentrations Detected in Surface Soil Samples Collected from the 100-N Area on the Hanford Site, 1997 through 2002	3.20
3.2.8	Concentrations of Selected Radionuclides in Surface Soil Samples Collected from the 100-N Area on the Hanford Site, 2002	3.20
3.2.9	Average Radionuclide Concentrations Detected in Surface Soil Samples Collected from the 200/600 Areas on the Hanford Site, 1997 through 2002	3.20
3.2.10	Concentrations of Selected Radionuclides in Surface Soil Samples Collected from the 200/600 Areas on the Hanford Site, 2002	3.21
3.2.11	Average Radionuclide Concentrations Detected in Surface Soil Samples Collected from the 300/400 Areas on the Hanford Site, 1997 through 2002	3.21
3.2.12	Concentrations of Selected Radionuclides in Surface Soil Samples Collected from the 300/400 Areas on the Hanford Site, 2002	3.21
3.2.13	Radionuclide Concentrations in Soil Samples Collected by the Environmental Restoration Contractor on the Hanford Site, 2002	3.22
3.2.14	Average Radionuclide Concentrations Detected in Vegetation Samples Collected from the 100-N Area on the Hanford Site, 1997 through 2002	3.24
3.2.15	Concentrations of Selected Radionuclides in Vegetation Samples Collected from the 100-N Area on the Hanford Site, 2002	3.24
3.2.16	Average Radionuclide Concentrations Detected in Vegetation Samples Collected from the 200/600 Areas on the Hanford Site, 1997 through 2002	3.24
3.2.17	Concentrations of Selected Radionuclides in Vegetation Samples Collected from the 200/600 Areas on the Hanford Site, 2002	3.25
3.2.18	Average Radionuclide Concentrations Detected in Vegetation Samples Collected from the 300/400 Areas on the Hanford Site, 1997 through 2002	3.25
3.2.19	Concentrations of Selected Radionuclides in Vegetation Samples Collected from the 300/400 Areas on the Hanford Site, 2002	3.26
3.2.20	Thermoluminescent Dosimeter Results for Waste Handling Facilities on the Hanford Site, 2001 and 2002, Based on 24 hours/day	3.26
3.2.21	Investigative Samples Collected on the Hanford Site, 1994 through 2002	3.30
4.0.1	Routine Environmental Surveillance Sample Types and Measurement Locations On and Around the Hanford Site in Washington State, 2002	4.5

4.0.2	Samples Collected for the Hanford Site Surface Environmental Surveillance Project and Analytical Results Obtained, 2002	4.5
4.1.1	Pacific Northwest National Laboratory Air Sampling Locations On and Around the Hanford Site, Sample Composite Groups, and Analytes, 2002	4.9
4.1.2	Airborne Radionuclide Concentrations in the Environs of the Hanford Site, 2002 Compared to Previous Years	4.11
4.2.1	Surface Water Surveillance On and Near the Hanford Site, 2002	4.21
4.2.2	Columbia River Sediment Surveillance from Priest Rapids Dam to McNary Dam, 2002	4.22
4.2.3	Selected Radionuclide Concentrations in 100-N Area Riverbank Spring Water at the Hanford Site, 1997 through 2002	4.36
4.2.4	Concentration Ranges for Selected Chemicals in Water from Columbia River Springs at the Hanford Site, 1999 through 2002	4.37
4.3.1	DOE-Owned Drinking Water Systems on the Hanford Site, 2002	4.44
4.3.2	Concentrations of Selected Radiological Constituents in Hanford Site Drinking Water, 2002	4.47
4.3.3	Tritium Concentrations in Hanford Site 400 Area Drinking Water Wells, 2002	4.47
4.4.1	Sampling Locations, Frequencies, and Analyses Performed for Food and Farm Products Routinely Sampled Around the Hanford Site, 2002	4.51
4.5.1	Hanford Site Fish and Wildlife Sampling Locations and Analyses, 2002	4.57
4.6.1	Dose Rates Measured by Thermoluminescent Dosimeters on the Hanford Site, 2002 Compared to Previous 5 Years	4.66
4.6.2	Dose Rates Measured by Thermoluminescent Dosimeters at Perimeter and Offsite Locations on the Hanford Site, 2002 Compared to Previous 5 Years	4.66
4.6.3	Dose Rates Measured by Thermoluminescent Dosimeters Along the Hanford Reach of the Columbia River, 2002 Compared to Previous 5 Years	4.67
4.6.4	Average Exposure Rates Measured by Pressurized Ionization Chambers at Four Locations Around the Hanford Site, 2002	4.69
4.6.5	Quarterly Average Exposure Rates Measured by Thermoluminescent Dosimeters at Four Locations Around the Hanford Site, 2002	4.70
5.0.1	Dose to the Hypothetical, Maximally Exposed Individual Residing at Riverview from 2002 Hanford Site Operations	5.4
5.0.2	Collective Dose to the Population from 2002 Hanford Site Operations	5.5
5.0.3	Comparison of Doses to the Public from Hanford Site Effluent to Federal Standards and Natural Background Levels	5.6
5.0.4	Inhalation Doses On and Around the Hanford Site Based on 2002 Air Surveillance Data	5.9
5.0.5	Results of RAD-BCG Calculator Screenings at the Hanford Site, 2002	5.11

5.0.6	Estimated Risk from Various Activities and Exposure	5.12
5.0.7	Activities Comparable in Risk to the 0.02-mrem Dose Calculated for the Hanford Site's 2002 Maximally Exposed Individual.....	5.13
6.0.1	Chemical and Radiological Groundwater Contaminants and Their Link to Areas and Facilities on the Hanford Site	6.1
6.1.1	Summary of the Hanford Site Groundwater Monitoring Program by Geographic Area, Calendar Year 2002	6.6
6.1.2	Summary of the Hanford Site Groundwater Monitoring Program by Monitoring Purpose, Calendar Year 2002	6.6
6.1.3	Hanford Site Well Naming System	6.10
6.1.4	Radionuclides, Water Quality Parameters, Metals, Anions, and Other Contaminants Analyzed for in Hanford Site Groundwater Samples During 2002	6.11
6.2.1	Areas of Contaminant Plumes on the Hanford Site at Levels Above Drinking Water Standards, 2002	6.13
6.2.2	Summary of Maximum Contaminant Concentrations in Hanford Site Groundwater, 2002	6.15
6.2.3	Summary of Maximum Contaminant Concentrations in Hanford Site Groundwater by Monitoring Purpose, 2002	6.16
6.4.1	Summary of Hanford Site RCRA Monitoring Results in 2002	6.59
8.1.1	Requests for Meteorological Data from Facilities and Organizations On and Off the Hanford Site, 2002	8.4
8.1.2	Monthly and Annual Climatological Data from the Hanford Meteorology Station, 2002	8.8
8.2.1	Frequency of Occurrence and Average Canopy Cover of Cheatgrass on Hanford Site Monitoring Plots Before and After the 2000 24 Command Wildland Fire	8.17
8.2.2	Ecological Reviews Performed on the Hanford Site, 1997 through 2002	8.17
8.6.1	Average Concentrations of Cesium-137 and Range of Values in Conifer Forest Stands on the Western and Eastern Slopes of the Cascade Mountains in Washington State, 1967-1969 and September 2002	8.36
9.0.1	Summary of Field Replicate Results for the Surface Environmental Surveillance Project at Hanford, 2002	9.2
9.0.2	Summary of Laboratory Performance on DOE Quality Assessment Program Samples for the Surface Environmental Surveillance Project at Hanford, 2002	9.4
9.0.3	Summary of Laboratory Performance on Hanford Site Surface Environmental Surveillance Project Samples by the Environmental Resource Associates Proficiency Testing Program, 2002	9.4
9.0.4	Summary of Hanford Site Surface Environmental Surveillance Project Blind Spiked Determinations, 2002	9.5
9.0.5	Pacific Northwest National Laboratory Determinations of Quality Assurance Task Force Intercomparison Soil Sample at Hanford, 2002	9.6

9.0.6	Comparison of Co-Sampling Results for Samples Collected Near the Hanford Site, 2002	9.8
9.0.7	Comparison of Pacific Northwest National Laboratory Thermoluminescent Dosimeter Results with Known Exposure, 2002	9.8
9.0.8	Hanford Site Laboratories Used by Site Contractors and Types of Effluent and Near-Facility Monitoring and Samples Analyzed, 2002	9.9
9.0.9	The Hanford Site's Waste Sampling and Characterization Facility Performance on DOE Quality Assessment Program Samples, 2002	9.10
9.0.10	The Hanford Site's 222-S Analytical Laboratory Performance on DOE Quality Assessment Program Samples, 2002	9.10
9.0.11	The Hanford Site's 222-S Analytical Laboratory Performance on EPA Laboratory Water Pollution Inorganic and Organic Studies, 2002	9.11
